1 General Information

1.1 System Overview

Multiply ActiveDayz is an application that tracks the time that a user spends at a partners event or location (such as a gym) in order to provide incentives based on a score called "ActiveDayz".
The application will allow current users to register and then log in, provding access to features such as sharing achievements, joining communities and participating in challenges (gamification).

2 System Summary

2.1 System Configuration

The system currently requires:

- Android 4.1 OS

- 1GB RAM

- 40MB Disk Space

- Location Services

- Bluetooth 2.0

Kindly Refer to "Installation" subsection under the "Getting Started" section for detail regarding application-specific system configuration.

3   Getting Started

3.1   Installation

The application will be available on the Google Play Store for download on Android devices.
As aforementioned, regarding configuration of the application, location and bluetooth services are required. The user will be prompted regarding these permissions and will have to allow these permissions for full functionality.
Optional settings and profile customization can be configured via the side drawer.
Furthermore, a one time menu will be displayed in order to link social media accounts for "one tap sharing". This can be changed via the settings menu at any time.

3.2   Logging in

A first time user will have to initially register in order to verify that he/she is in fact a current Multiply member.
The user will then be sent an OTP in order log in for the first time.

3.3   System Menu

The system menu is contained in the side drawer which will include settings and profile customization.

3.4   Exiting the System

User can easily logout using the logout option on bottom of the sidedrawer.

4 Using the System

4.1 Get ActiveDayz

The user will be allowed to retrieve his/her ActiveDayz score by pressing the circular "Get ActiveDayz" on the main activity screen. The score will be fetched and displayed within the same circular button.

4.2 Achievements

User can share achievements to social media via the first submenu by simply tapping the desired achievement.
Shared achievements are stored in the "View Previous Achievements" submenu.

4.3 Communities

The communities menu has a number of submenus. Within this menu, users can view their current communities as well as create, join and challenge communities by selecting the desired submenu and entering the required information.
Friends can also be invited within this menu.

4.4 Leaderboards

The leaderboard menu contains two submenus namely "Global" and "Communities". Users can select a desired leaderboard to view and then view specific profiles of leaders if desired.

4.5 Settings

Settings can be found within the side drawer. Here, users can edit their profiles, social media settings and notification settings.

5   Feedback and Reporting

Current feedback is to be handled using the support option within the side drawer. Here, users can choose between multiple options after which a short form will have to be filled in and submitted.

Casual support is also offered by selecting the "chat to a consultant" option which will redirect the user to the Momentum website, where a representative will tend to the matter accordingly.
